Summary

MERN Stack Developer with strong interpersonal and technical skills. Familiar in front and back end development. Seeking to transition my freelance work into a Full Stack Web Development position to further enhance my knowledge and technical skills.

Technical Skills

-HTML/CSS	-React.JS	-Node.JS
-Bootstrap/Materialize	-API's	-AJAX/JSON
-Javascript/jQuery	-Express.js	-ORM Tools
-Firebase	-MongoDB/Mongoose	-MySQL/Sequelize
-Git	-Heroku	-React Native

Education

Full Stack Coding Bootcamp: University of Arizona, 2017, 3.8 GPA
Bachelors of Arts in Communication: Arizona State University, 2014, 3.0 GPA

Experience

Freelance Web Developer, Scottsdale, AZ

- Translating ideas from high profile clients into Full Stack websites and applications.
- Converting projects into a mobile responsive platform.
- Created online application that allows users to input grocery items they have at home and generates recipes based off those items.
- Utilize HTML ,CSS, Responsive design, JavaScript, jQuery, Node and other frameworks and libraries to meet client needs.
- Collaborate with other developers to create web content and applications.

Main Projects

- **Pantry Chef-** This app takes multiple APIS, demonstrates an understanding in Materialize and CSS. This app uses search parameters to search through a recipe API and generate recipes based on the items you have in your household. The app also uses Google maps to locate nearby grocery stores for remaining ingredients.
- **Rotten Potatoes-** This website is a full stack MERN application. It is similar to Rotten Tomatoes except it is reviews of people instead of movies. It shows an understanding in React.js, Node, Mongo/Mongoose and Express.
- **Volunteer To Serve-** This full stack website is an extension of volunteertoserve.org. It allows the community to post local volunteer opportunity, share experiences through blog postings and has a full mysql database for admin supervision.
